Market Performance Stage

Albuquerque, NM: Ignition Stage

Ignition	The Albuquerque, NM market is currently in the 'Ignition' stage of the performance cycle. In this stage, hotels typically perform adequately for operators to enjoy positive returns, with confidence the economy will remain fully recovered from the pandemic. While the regional economy continues to recover, strong hotel performance locally is igniting expansion in certain key sectors. Example markets in this stage include Baltimore, MD; Miami, FL; and New Orleans, LA.
----------	---

Other Stages:

Regeneration	In the 'Regeneration' stage, hotels and the underlying economy are underperforming. The highest and best uses of hotel assets are still being challenged by lingering pandemic impacts, oversupply, weak economic indicators, and/or poor corporate contribution. Hotel investors look for opportunities to either exit or regenerate demand. Example markets in this stage include Cincinnati, OH; Detroit, MI; and Knoxville, TN.
Absorption	In the 'Absorption' stage, hotels are underperforming but in an economy with resilience and confidence the economy will shed any lingering pandemic impacts, presenting upside for CRE. Barriers to entry are high and the market hosts little or no new supply, allowing for the existing stock of rooms to be absorbed. Example markets in this stage include Minneapolis, MN; ; and .
Expansion	In the 'Expansion' stage, hotels perform adequately, contributing to a resilient economy that has fully exited from the pandemic environment. Displacement demand is high, new hotel supply is feasible (despite barriers normally being high), and the overall economy is expanding. Example markets in this stage include Anaheim, CA; Atlanta, GA; and Austin, TX.
