Market Performance Stage

Houston, TX: Absorption Stage The Houston, TX market is currently in the 'Absorption' st

The Houston, TX market is currently in the 'Absorption' stage of the performance cycle. In this stage, hotels are underperforming but in an economy with resilience and confidence the economy will recover from the COVID-19 crisis, presenting upside for CRE. Barriers to entry are high and the market typically hosts little or no new supply, allowing for the existing stock of rooms to be absorbed. Example markets in this stage include Anaheim, CA; Austin, TX; and Boston, MA.

Other Stages:

In the 'Regeneration' stage, hotels and the underlying economy are generally underperforming. The highest and best uses of hotel assets are challenged whether by COVID-19 impacts, oversupply, weak economic indicators, and/or poor corporate contribution. Hotel investors look for opportunities to either exit or regenerate demand. Example markets in this stage include Cincinnati, OH; Detroit, MI; and New Orleans, LA.

In the 'Ignition' stage, hotels generally perform adequately for operators to enjoy positive returns, with confidence the economy will recover from the COVID-19 crisis. While the general economy lags, strong hotel performance can ignite expansion in certain key sectors. Example markets in this stage include Knoxville, TN; Miami, FL; and Michigan North Area, MI.

In the 'Expansion' stage, hotels generally perform adequately and in an economy with resilience and higher confidence the economy will recover from the COVID-19 crisis. Barriers to entry are low, displacement demand is high, and the market typically experiences an expansion of both hotel supply and general economic conditions. Example markets in this stage include Atlanta, GA; Fort Lauderdale, FL; and Fort Worth, TX.
